

Horse Facilities

Often used in conjunction with the Livestock Pavilion, as well as the recently updated and relocated 29,000 sq. ft. outdoor arena exercise ring, the majestic two-acre, 12-aisle Horse Barn is completely enclosed. It provides unbeatable facilities for all types of horse shows and sales. Permanent tie and box stalls may be rented by the aisle.

The Horse Barn was originally built in 1907, with three additions through 1929 and a major renovation in 1999. Stately stone and brick walls accent a raised center area flanked by shed roofs on the north and south featuring rhythmic gabled ventilators.
